

Doric Green Power GmbH & Co. KG

In mid-2017 two of the portfolio's biogas facilities were sold. The investment company will proceed with the five remaining facilities.

In addition to the continued technical reliability of the facilities, the economic performance of the investment hinges on future weather conditions and on the main cost items for the operation of the biomethane facility (substrates in particular).

Main Parameters	
Details of the investment entity	
Legal form	GmbH & Co. KG
Equity	EUR 26,890,000
Type of income	Trading income
General partner	Doric Power GmbH

Deviation Analysis
As the sales prospectus does not include any specific projects and therefore no annual forecasts, a reliable comparison of target and actual figures is not possible.

Details of the Assets				
Facility type	Location	State	Output	In operation since
Biomethane	Schöpstal	Saxony	2.7 MW _{el} ¹	2011
Photovoltaics	Hollenbach	Bavaria	3.7 MWp	2009
Photovoltaics	Marktheidenfeld	Bavaria	5.6 MWp	2010
Photovoltaics	Oberottmarshausen	Bavaria	0.97 MWp	2010
Photovoltaics	Sonnenwalde	Brandenburg	1.5 MWp	2010

¹Equivalent to around 10 million cubic metres of crude biogas.

The four photovoltaic facilities and the biomethane facility held by the investment portfolio generate around 12.7 million kilowatts of electricity and 5.4 million cubic metres of refined biomethane each year. This is sufficient to supply roughly 2,900 households with electricity and 3,000 households with gas. The performance of the investment depends on the results of the individual projects.

Success through Experience
